

HEARD IN MANNING

How Bad Backs Have Been Made Strong—Kidney Pills Corrected.

All over Manning you hear it. Doan's Kidney Pills are keeping up the good work. Manning people are telling about it—telling of bad backs made sound again. You can believe the testimony of your own townspeople. They tell it for the benefit of you who are suffering. If your back aches, if you feel lame, sore and miserable, if the kidneys act too frequently, or passages are painful, scanty and off color, use Doan's Kidney Pills, the remedy that has helped so many of your friends and neighbors. Follow this Manning citizen's advice and give Doan's a chance to do the same for you.

W. L. White, grocer, S. Boundary St., says: "I suffered from kidney trouble for years. I had to get up very often during the night to pass the kidney secretions and they were highly colored and contained sediment like brick-dust. I suffered constantly from backaches and sharp pains across my loins. I could hardly turn in bed and mornings my back was so lame and sore that it was difficult for me to dress myself. Nothing helped me until I got Doan's Kidney Pills. After using one box, my back didn't ache any more and the lameness and soreness had all disappeared. I don't have to get up now to pass the kidney secretions and am feeling twenty years younger."

Always Reliable.
Over six years later Mr. White said: "I have used Doan's Kidney Pills whenever I have had any sign of kidney trouble and they have kept my back and kidneys in good condition."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. White has twice publicly recommended. Foster-Milburn Co., Props., Buffalo, N. Y.—adv.

BRUNSWICK TOBACCO

Lawrenceville Getting Ready to Handle Biggest Crop Ever Grown.

Lawrenceville, Va.—The outlook for greater business in loose-leaf tobacco in the Lawrenceville market is very bright. The crops of both bright and dark, especially the brights, will be larger in Brunswick County this year than ever before. It became evident very early that Lawrenceville will require more warehouse facilities and the Business Men's Association took the matter up some time ago.

At a special meeting of the Association held last week, arrangements were made for the building of another brick warehouse of the same dimensions and the same facilities as the one that has been so successfully operated here for the past four years. Work will be commenced on the building the latter part of this month and the contract calls for its completion in ample time for the fall business.

In addition, another warehouse for the handling of dark shipping tobaccos will be opened the coming season. A building that has already been operated as a warehouse for both dark and bright will be utilized. In addition to its warehouses, Lawrenceville has two other air-drying prize houses and three tobacco packing houses, and others of like character will probably be built very soon.

With these increased warehouses and packing facilities and with Brunswick and adjoining counties enlarging their tobacco crops this year, it is believed that the Lawrenceville market will sell during the coming season from seven to ten million pounds of the weed.—Times-Dispatch.

THE CONFRONTING QUESTION—WHAT SHALL THE GARDENER DO?

Clemson College, S. C., June 25.—This question is daily confronting all wide-awake gardeners, or would be such, and is one of vital importance at all times and most especially at this time. Every man, woman, and child should play some part towards growing and maintaining a good garden, success being measured by the ability to do the right thing at the right time.

Four essentials of good gardening are through preparation, careful planting, frequent shallow cultivation, and consecutive plantings; all of which are of equal importance and neither of which can be substituted one for the other.

Make the first or consecutive planting of snap beans—Bountiful, or Stringless Greenpod; sugar corn—Stowell's Evergreen; lima beans—Fordhook or Henderson's Bush Lima; cucumbers—Green Prolific or Fordhook Pickling; peas—Black Eye; Irish potato—Lookout Mt., Green Mt., Peerless, Rural New Yorker, or Burbank; pumpkins—Striped Cushaw or Large Cheese; also make planting of Succession and Charleston Wakefield cabbage, and Georgia Southern collards for transplanting to the field during late summer.

Continue to plant sweet potatoes, as this crop will make after the grain harvest. Where plants are not available, use 6 to 8 inch one leaf cutting.

ARMIES MUST HAVE TOBACCO

Soldiers in Trenches Get Vast Amount of Comfort From the Fragrant Weed—A Necessity Ranking With Food.

If you have ever served in the Army or Navy, and especially if you have ever soldiered in the trenches, you will agree that tobacco is only secondary as a necessity in war time to ammunition. Commenting on this phase of war necessities, a contemporary says that next to ammunition the greatest necessity in time of war is tobacco. It is not only the greatest necessity, but the greatest comfort.

You might imagine that food or shelter is more important to a fellow out there than his cigarette or pipe, but take it from one who has been there and knows, tobacco is the most important of all. A soldier can fight without food and without shelter, if he has to, but his nerves will go to pieces if he can't get a chance to smoke.

Maybe you remember the authenticated story of the young English lieutenant who held a first-line trench angle single-handed without food or sleep for forty-eight hours against a company of Germans. He used the old type of hand grenades with fuses. He smoked cigarettes and lighted the fuses from the cigarettes. The tobacco kept him going. He couldn't have done it on concentrated beef extract or biscuits.

Maybe you have seen real motion picture films of troops going into battle. If so, you have remarked the cigarettes and pipes and stogies stuck between the grim determined lips.

If you have happened ever to be at a field hospital when the wounded came in on stretchers from the front—the poor fellows who have given

Keep Well

Do not allow the poisons of indigestible food to accumulate in your bowels, where they are absorbed into your system. Indigestion, constipation, headache, bad blood, and numerous other troubles are bound to follow. Keep your system clean, as thousands of others do, by taking an occasional dose of the old, reliable, vegetable, family liver medicine.

Thedford's

Black-Draught

Mrs. W. F. Pickle, of Rising Fawn, Ga., writes: "We have used Thedford's Black-Draught as a family medicine. My mother-in-law could not take calomel as it seemed too strong for her, so she used Black-Draught as a mild laxative and liver regulator. We use it in the family and believe it is the best medicine for the liver made." Try it. Insist on the genuine—Thedford's. 25c a package. E-75

their limbs and their eyes and their blood for their country—you know that the stories written by the lady-like writers who stay at home about the cry for a cup of cold water or a priest is fiction. The first thing they whisper for is a cigarette. If a wounded man is so far gone that he doesn't want to smoke, there is not much hope for his recovery.

There is nothing abnormal about the solace of tobacco on the battlefield. A battlefield is simply the tightest tight a fellow can get into, and when a man is in a tight it always comforts him to smoke. When it is a battle of business instead of arms, a good cigar always helps solve the problem.

If you've ever seen Vardon, the greatest golfer on earth, in a tight place, you have seen him light a cigarette and take a few deep puffs before making his shot. And his nerves are today the steadiest of any man's on earth. The universal use of tobacco is one of the greatest blessings conferred by Providence upon humanity, and always the more a man is in need of it the more he appreciates it.—Retail Tobacconist.

Piles Cured in 6 to 14 Days

Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. The first application gives Ease and Rest. 50c.
